HUNTER 360° Software
Experience the future of irrigation with our 360-degree view technology

Client Requirements:

- **on-premises** based software

- **Real-time communication**

- **Current draw Monitoring in Realtime**

- **Flow monitoring and reporting**

- **Map-based, status for Controllers, Stations, Flow sensors, and Weather stations**

- **Using Solar Sync for ET-based irrigation**

- **Dashboard with consolidated data for easy analytics**

- **Live banner for active alarms**

- **Historical alarms, events, and trends**

- **LAN (Ethernet) connectivity / FOC**

- **Excel reports for Flow totals, Flow Rates, Controller Alarms, Current Draw, Seasonal adjustment values, and more**

- **Data encryption and detailed user access**

- **Unlimited numbers for Controllers and weather sources**

HUNTER 360° Software

4102-acre large-scale public park and urban district in Riyadh, Saudi Arabia.

Client Requirements:

- **on-premises** based software
- Integrate With **CAFM** IoT Platform
- Real-time communication
- Current draw Monitoring in Realtime
- Flow monitoring and reporting
- Map-based, status for Controllers, Stations, Flow sensors, and Weather stations
- **Using Solar-Sync & Weather Station for ET-based irrigation**
- Dashboard with consolidated data for easy analytics
- Live banner for active alarms
- Historical alarms, events, and trends
- **LAN (Ethernet) connectivity / FOC**
- Excel reports for Flow totals, Flow Rates, Controller Alarms, Current Draw, Seasonal adjustment values, and more
- Data encryption and detailed user access
- Unlimited numbers for Controllers and weather sources

HUNTER 360° Software
Experience the future of irrigation with our 360-degree view technology

Client Requirements:

- **on-premises** based software
- Integrate With **Honeywell IoT Platforms**
- Real-time communication
- Current draw Monitoring in Realtime
- Flow monitoring and reporting
- Map-based, status for Controllers, Stations, Flow sensors, and Weather stations
- **Using Solar-Sync for ET-based irrigation**
- Dashboard with consolidated data for easy analytics
- Live banner for active alarms
- Historical alarms, events, and trends
- **LAN (Ethernet) connectivity / FOC**
- Excel reports for Flow totals, Flow Rates, Controller Alarms, Current Draw, Seasonal adjustment values, and more
- Data encryption and detailed user access
- Unlimited numbers for Controllers and weather sources

HUNTER 360° Software

Experience the future of irrigation with our 360-degree view technology

Client Requirements:

- **on-premises** based software
- **Integrate With Honeywell IoT Platform**
- **Real-time communication**
- **Current draw Monitoring in Realtime**
- **Flow monitoring and reporting**
- **Map-based, status for Controllers, Stations, Flow sensors, and Weather stations**
- **Using Solar-Sync for ET-based irrigation**
- **Dashboard with consolidated data for easy analytics**
- **Live banner for active alarms**
- **Historical alarms, events, and trends**
- **LAN (Ethernet) connectivity / FOC**
- **Excel reports for Flow totals, Flow Rates, Controller Alarms, Current Draw, Seasonal adjustment values, and more**
- **Data encryption and detailed user access**
- **Unlimited numbers for Controllers and weather sources**
